Ford F-550 Medic Unit Fluids (New M56 and M60)

Please be advised that the new Ford F-550 Medic Units use a different engine oil, transmission fluid, coolant, and power steering fluid than other medic units in the fleet. The fluids for these units are listed below:

- Engine oil: SAE 5W40 – Full Synthetic
- Transmission fluid: Mercon LV Automatic Transition Fluid
- Coolant: Motorcraft Orange Pre-diluted Antifreeze
- Power steering fluid: Mercon LV
- DEF: Same as all other units with DEF

No field personnel should be adding brake fluid to ANY medic unit. If the brake fluid is found low, Fire Maintenance MUST be contacted.

All items may be obtained by submitting a Form #111 to Fire Supply.
