

## EMS Continuing Education Course List Examples

You will find various ALS refresher courses and EMS continuous education courses below. This is not an exhaustive list; however, this list can help with finding, taking, and recording EMS continuing education for your recertification.

**Remember** – There are limited amounts of distributive education in which you can use for your recertification. Distributive education includes education such as 100% online, article reviews, video reviews, directed studies, and CAPCE F3 courses. This education does **NOT** have interaction between an instructor and student. Please see requirements on distributive education allowance for each component of national, state/local, and independent.

### CAPCE Accredited Refresher Courses (F5)

- OnCourse Learning (Distance CME), A Relias LLC Company
  - <http://www.distancecme.com>
- EMT & Fire Training, Inc.
  - <http://www.emtfiretraining.com>
